Potato Processing Production Line

Allbest Creative Development Ltd. (ALLBEST)

Production Line for Oil Fried Potato Chips (Finished Products:100-500 Kg/H)

Oil fried potato chips is one kind of snack processed from fresh potato chips after washing, peeling, slicing, frying and flavoring. It remains the special delicious flavor of roasted potato on one respect and has the characteristics of rich nutrition, delicious, convenient on the other and thus won the favor of the consumers.

Production capacity:	Finished products 50-300 (500) kg/h Finished products: 100-150 kg/h for the chips mixed with other materials.	
Water consumption:	3-10 ton/h	
Electricity consumption:	about 30-60 kW	
Steam consumption:	200-500 kg/h	
Workshop area:	120-300 m2	
Fuel:	Coal, gas, oil	

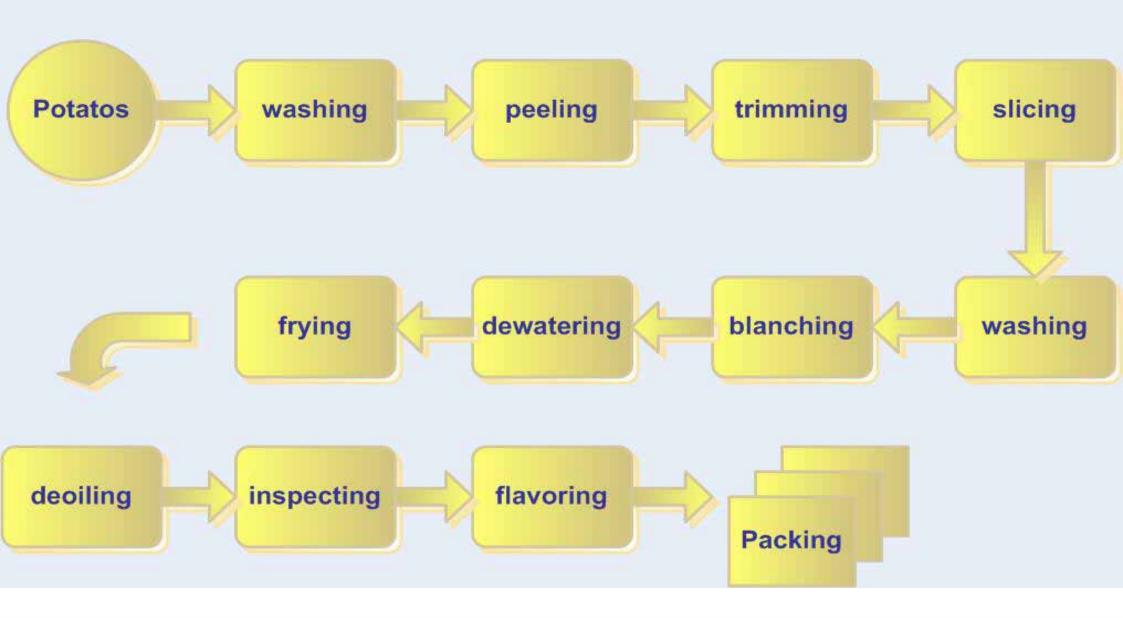

Main Process Flow Chart

French Fried Production Line (Max. 2 Tons/Hr Potato)

French fried is the tradition fast food in the western countries with several dozers years of processing history. French fried is savory and crisp, taste good and delicious as well as with rich nutrition, so it is the people's favorite food all over the world.

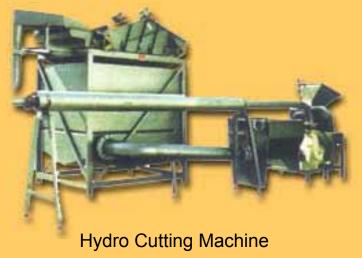

Started from 1996, the first French fried production line was established by us, and it's product has been widely sold in the supermarket, whose quality has satisfied the international advanced standard. We can offer series of equipment, which may transform the potatoes to the snack food with hi-benefit

Capacity:	350kg/hr (End Product) Max. 2 tons/Hr (raw material processing)
Power:	450 kW
Water Consumption:	8t/h
Steam Consumption):	3 ton/hr
Workers:	23 person/shift

Deep Fryer

Processing Line of Dehydrated Mashed Potatoes-Potato Flakes

The potato flakes are manufactured by processing potatoes and wasted potato strips which coming from French fries production. The flakes keep the original flavor and nutrition of potatoes, and are popular food in the world due to low fat and sugar.

Adopted the advanced foreign technology, the whole production line is China-made, especially available for the county enterprises. Operating easily and running reliably, the quality of potato granules is stable and the economic benefit is excellent.

Capacity:	300kg/Hr end product	
Water Consumption:	6 ton/hr	
Power:	280 kW	
Steam Consumption:	5 ton/hr	
Workshop Area:	800 m2

Drum Dryer

The machine can be used to manufacture gelatinized starch, vegetable syrup, bon mud, chemical materials, coffee, baby's food, potato flakes and etc., which the flash dryer can't dry due to high viscosity. The machine is consisted of big drum, applicator rolls, scraper and automatic control system. According to demands, we can offer series of drum dryers with capacity range from 600 to 6000tons per year. The technology is derived from national "Ninth-five-year Plan", and the model GT20/40 drum dryer is created originally in China.

Model	Output (kg/h)	Power (kW)	Steam Consumption (ton/h)	Dryer Dimension (d×h)	Steam Pressure (MPa)
GT5/15	25	30	0.5	500×1500mm	0.8-1.0
GT15/30	150-180	65	1.5	1500×3000mm	0.8-1.0
GT15/40	200-240	85	2.0	1500×4000mm	0.8-1.0
GT20/40	250-350	102	3.0	2000×4000mm	0.8-1.0
